**5)** Pass/Fail Result is given to business employee

Enable identity verification for customers who aren't physically face-to-face with your team. WebID allows businesses to confidently authenticate IDs remotely using the customer's own smartphone.

Key Features:

- **Simple & Secure Scanning:** Your customer captures images of their ID (front & back) and a biometric selfie using their smartphone.
- **Advanced Authentication:** Verifies security features, including OCR, 1D/2D barcodes, and photo-printing techniques to detect fake IDs.
- **Biometric Face Matching:** Liveness detection checks for spoofing and AI images to ensure the person scanning the ID is real and matches the ID.
- **Real-Time Results**: Pass/Fail results are sent directly to your business' employee.
- **Flexible Subscriptions:** Pay-Per-Scan or unlimited plans available.

Experience the power of Fraud Fighter ID on your phone or tablet.

Simply snap a photo of the ID and get the authentication result straight to your mobile device!
