

# TitlePoint®

## High Performance in Title Searching and Order Management

TitlePoint sets the standard for automation and efficiency in title order searching and order management. Its leading-edge plant architecture and technical design enables high-volume title production.

Access rich, geographically-posted plants and related land record documents, and easily produce comprehensive search packages that combine title, tax, document image and starter records in an intuitively-organized, examination-ready package.

Connect using a Web browser-based interface that has been optimized for high-volume order production. TitlePoint's full functionality is also available using Web Services / XML, which enables you to place and receive orders using your in-house production platform.

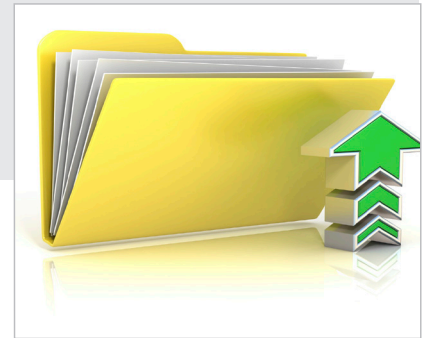

## Improve Your Workflow and Provide Better Service

TitlePoint features these advanced capabilities:

- Expand or refine your search criteria at any time
- Open and view source documents directly from the title chain
- View, annotate and rotate document images using the integrated image viewer
- Convert image areas in source documents to text using OCR
- Automate order date-down and closing
- Use Order Monitor to monitor orders for new postings and eliminate surprises at the closing

## Join Our User Community and Help Improve Data Quality

TitlePoint users can easily report data and image discrepancies simply by clicking on a record or image. The notification is immediately routed to an operations center where the issue is researched, resolved and findings reported back to the user.

## Advanced Design Yields Greater Productivity

Produce examination-ready search packages faster and with greater efficiency using TitlePoint's advanced architecture and workflow innovations.

## Everything You Need in One Application.

- Perform combination searches of tax, title and images, including starter records
- Create merged searches that combine multiple parcels into a single package
- Automate property, tax and name searching using the Auto-run feature
- Perform specialized tax, property, name, instrument and starter record searches
- Take advantage of TitlePoint's automated order date-down and fall-out capability

## Geographic Coverage

TitlePoint is available in:

### Arizona

La Paz  
Maricopa  
Mohave  
Pinal  
Yavapai

### California

Alameda  
Butte  
Contra Costa  
El Dorado  
Fresno  
Humboldt  
Imperial  
Kern  
Kings  
Lassen  
Los Angeles  
Madera  
Mendocino  
Merced  
Napa  
Nevada  
Orange  
Placer  
Plumas  
Riverside  
Sacramento  
San Benito  
San Bernardino  
San Diego  
San Francisco  
San Joaquin  
Santa Barbara  
Santa Clara  
Shasta  
Solano  
Stanislaus  
Tulare  
Ventura  
Yolo

Yuba

### Illinois

Cook  
DeKalb  
DuPage  
Kane  
Kendall  
Lake  
McHenry  
Will

### Illinois

La Porte  
Lake  
Porter

### Washington

Thurston

We are always improving TitlePoint's features and functionality.

### New in Our Latest Release:

- TitlePoint counties now access our modern plant architecture that uses a single plant format
- Now perform Optical Character Recognition on document images you import
- Automatically pull map images that correspond to the Property in Question when you perform a search. Links to maps appear in the Property History section
- Bookmarks provide a table of contents for all search and image elements for saved and emailed PDF files created using the Order Home Page and Recent Activity
- A new "viewed" icon tells you which images you have already looked at when you quick-view images within an order
- XML Integration with third-party production platforms is now easier: we have added full document-type descriptions and document categories to refine the integrator logic. A pre-defined image key now retrieve images. Last includes all amounts and comments on the record
